

The Terminal, Richmond's oldest newspaper, gives you the news you should have and will continue to protect your interests.

RICHMOND TERMINAL

The Terminal newspaper honestly works for the best interests of the taxpayers and works for more industries and Richmond pay rolls.

VOL. XXVI

RICHMOND, CALIFORNIA, FRIDAY, NOVEMBER 22, 1929

No. 47

RICHMOND DEDICATES NEW RADIO STATION

Enthusiastic Boosters Surround C. of C. Banquet Table and Broadcast Richmond's Advantages

Richmond chamber of commerce held their annual meeting Thursday night at Hotel Carquinez, the big stunt of the evening being the new radio station KFWM.

Richmond can now talk to the entire country and tell the world of our inducements here for making this city the industrial center and payroll town. With a cannery and fish industry recently added for a starter, after a lull of three years, it is predicted that with the broadcasting attachment via the air, the opportunities offered in

an industrial way will be taken advantage of, according to the optimistic forecast of President Sanford's pictorial address.

The banquet was a success and the spirit manifested itself in the long list of speakers whom Joseph F. Brooks, as toastmaster, introduced.

Mayor Paulson, Ex Mayor Mattie Chandler, Fred D. Parr, F. J. Koster, C. A. Fleming and others made appropriate contributions in oratory and good will.

New Bridge to Replace Old One

Martinez, Nov. 22.—Holding that an emergency exists, the Contra Costa county board of supervisors has instructed the county surveyor to build under force account a bridge across Walnut Creek in Green Valley to replace a structure destroyed last week by fire. It is estimated that the bridge will cost about \$4000.

Berkeley Speakers

Hollis Thompson and Thomas Nielson of Berkeley were speakers at the Lions club Wednesday.

Cold Weather In Mid West

Chicago, Nov. 22.—The first real appearance of winter hit the middle west last night when the blizzard sent the mercury down to 12 below in the northern sections and near zero in Kansas, Nebraska and Iowa. Heavy snows are reported in the Rocky mountains.

The Richmond Terminal newspaper, established in 1903.

Bridge Steel In Position

Martinez, Nov. 22.—The U. S. Steel Products Co. swung the first steel in position for the \$12,000,000 S. P. bridge across Suisun Bay yesterday.

Local Scenes on Silver Sheet

The Richmond Theatre, Fifth and Macdonald, has contracted with a Hollywood concern to produce a 2-reel film of local scenes of Richmond, to be shown in connection with the regular December 5 and 6 programs.

Proposed Directors

Incumbent members of the directorship of Richmond chamber of commerce who have been renominated, are: Joseph F. Brooks, J. A. McVittie, M. A. M. A. Hays, Ed Bull, O. R. Ludwig, T. H. DeLap.

New names entered in the contest are: Ira Vaughn, V. A. Fenner, Dr. W. E. Cunningham, Geo. F. Black, George Barnett and L. G. Eby.

New American Dirigibles Need Big Hangar

An exterior view of the giant hangar, at Akron, Ohio, which will house the new American zeppelins. The ship will be of 6,500,000 cubic feet in capacity, nearly twice the size of the German Graf Zeppelin.

Waterfront Fenced in At Foot of 14th Street

A fence more than a mile long has been erected by the Berkeley waterfront company, which encloses the property in V form, and which shuts out the property from the land side, so that admission can be gained only through a gate at the foot of 14th street.

The fence will border the Parr-Gilmore and Ford properties, also that of the Southern Pacific.

The fence is of steel construction and has no significance of any industries being constructed there, the fence merely indicating the property lines. Much of the company's holdings are under water.

Fish Cannery May Not Come

The final adoption of an ordinance ratifying the lease of 1½ acres of land on the outer harbor to Crivello Bros. for a fish cannery was held up for another week. City Attorney Tom Carlson advised that the investigation of water pollution was not quite completed.

Fred D. Parr expressed surprise at the delay, claiming that by modern treatment there was no danger of pollution of bay waters.

L. A. Bates and G. Matrangola are in Richmond from San Jose in the interest of the proposed Filice Perelli cannery.

Mrs. Ira R. Vaughn, injured by a fall, is reported much improved.

The principle of service, better service, more service, has become the greatest thing in life with American industrial leaders.

Pupils of Richmond Union high school will elect officers of the student association for the spring semester Dec. 4th.

Early Presidents Not Young
James Monroe, fifth President of the United States, best known to Americans of today for his enunciation of the "Monroe Doctrine" in his famous message to congress of December 2, 1823, was nearly fifty-nine when he began his first term as the nation's Chief Executive. This was about the age at which Jefferson and Madison, his immediate predecessors in the presidency, took office. Washington became President a little younger, at fifty-seven, while John Adams was still older, at sixty-one.—Gas Logic.

Obstacles to Progress
There are some that are not flatter to our citizens. There is, in the first place, the base feeling of fear. Lawyers are afraid that they will lose clients, bankers that they will lose deposits, ministers that important people will withdraw their support, those who manage public service corporations that they will suffer retaliation. Throughout the community is this benumbing dread of personal loss which keeps men quiet and servile.—Charles Hughes to Yale students in an address.

We have here the finest site on the Bay for an aviation field.

Gas Coming Without Odor or Color

Natural gas coming from the gas wells at the gas fields and after being run through the absorption plant where gas and other light oils are extracted, is delivered into the mains, without odor or color, for transportation to the point of use.

In order to give the gas an odor which serves as a warning should there be any leaks in the pipes or unlighted burners left turned on, the Pacific Gas and Electric Co. has perfected special equipment through which an odorant in the form of a light oil will be sprayed into the gas.

This equipment has been installed on the main transmission lines from the gas fields at Fresno, San Jose and Hollister.

The sprayed gas will have an odor similar to the manufactured gas and will be quite noticeable should there be leaks or unlighted burners left turned on.

Public Safety Road Rules

The state-wide traffic safety movement is now on, and there is a program for each month in the year, which might be well to read, as forewarned is helpful in minimizing the "Call-downs," as one does along the highway hogging the road and thinking about everything except his driving.

The following is the program mapped out by the committee in the state-wide movement to reduce the toll of traffic accidents:

November—Failure to keep to the right, hogging the road.
December—Disobeying regulations for pedestrian protection.
January—Failure to yield right of way at intersections.
February—Unlawfully passing standing street cars.
March—Failure to give required arm signals, failure to keep in proper lane when turning.
April—Cutting in and other law violations when overtaking.
May—Disobeying boulevard stop regulations.
June—Endangering safety of children at play, speed or inattention.
July—Railway stop signals (wig-wags).
August—Excessive speed at intersections where view is obstructed.
September—Unlawful speed in school zones.
October—Disobeying stop and go signals.
This program was planned at a recent meeting of the executive committee of the California Committee of Public Safety.

Health Hint
Life insurance companies find it pays to spend millions in campaigns of health education. It pays also for the individual to educate himself in the rules and practices of personal hygiene.

A classified advertisement brings home the bacon—10c per line.

Modesto's Charter Is Now Ready For Ratification

Modesto, Nov. 22.—The board of freeholders which has been busy for several weeks drafting a new charter form of government for Stanislaus county, has completed its labors and the document with its amendments is now ready to be submitted to the people for ratification or rejection in February, 1930.

The charter calls for a board of five supervisors at a salary of \$1500 a year each; a vote of the people every four years as to whether money shall be appropriated to the Stanislaus county development board and the farm bureau and the right of the people to vote on the salaries to be paid the various county officials.

Richmond's Postoffice

In speaking of city governments, charters, etc., one never hears a word of criticism about the Richmond postoffice, and our efficient postmaster, James N. Long. There is a reason for this fortunate condition which has brought our postoffice service up to its present high standard of efficiency. Postmaster Long has surrounded himself with capable and courteous help, who by modern and improved methods are rendering the best of service. The people of Richmond could not select a more competent and worthy postmaster than James N. Long. Keep him on the job.

Governor Young was presented with an invoice of Swiss cheese by the dairy bureau, but he has received nothing from the grape growers to "wash it down" with.

If they start in fingerprinting bootleggers, it may "complicate matters" still more.

Clara Phillips, Los Angeles hammer murderer, cannot get a hearing of the parole board for three years, or 1933.

A number of the Kiwanis' members attended the Alameda charter meeting Wednesday night.

Henry Ford does one thing that strengthens confidence. Instead of hot air, promises and noise, he advances wages and puts on more men. That beats banquet table oratory.

The special forecast for the football fans is: "Continued dry and clear, with congested highways."

Almee is now confronted with a \$250,000 damage suit. Almee's press agent never gets a vacation.

SANTA ROSA'S COST OF GOVERNMENT NOMINAL

Looks Like Richmond Needs Radical Change In Its Charter, According to Comparisons

In making comparisons with other cities of Richmond's size and population as to costs of government, The Terminal herewith publishes the figures giving the cost of Santa Rosa's government for 1928-29 under the charter system of that municipality. The statistics are taken from the city auditor's official report of Santa Rosa, and should be correct. Cost of city government, exclusive of street improvement bonds and interest, \$319,731.16. Assessed valuation, \$10,380,332. City tax rate, \$1.40 per \$100.

The costs of the various departments are as follows:

City Council.....\$ 486 40
Auditor & Assessor.....5,520 13
City Clerk.....2,460 59
City Manager.....3,981 80
City Attorney.....1,965 50
Total.....\$14,414.42

Salaries paid city officials of Santa Rosa are:

City Council.....\$ 486 40
City Clerk.....1,800 00
City Manager.....3,600 00
Auditor & Assessor.....2,371 98
City Treasurer.....300 00
City Attorney.....1,500 00
City Engineer.....800 16
Total.....\$10,858.34

Compare these figures with those of the cost of Richmond's local government, and ask yourself if it isn't about time to do something in the way of changing our plan of government.

The Charter League is publishing these figures, taken from the official auditor's reports, and an accurate check is made to prove that the figures are not garbled. Mr. Lee Windrem, Richmond attorney, is gathering data from the various cities of the state and will vouch for the accuracy of figures herewith published.

Revised Comparative Figures of the Costs of Government to June 30, 1929

The following figures are from the Auditor's 1928-29 Annual Reports and tabulated by Attorney Lee D. Windrem. The figures are identical with those published in the Reports. The figures prove conclusively that Richmond needs a new charter and a responsible city government.

BERKELEY	RICHMOND
Berkeley Tax Rate.....\$1.59	Richmond Tax Rate.....\$2.30
Assessed valuation.....\$90,364,775	Assessed valuation.....\$30,925,830

Charter Meeting MEMORIAL HALL

Wednesday Eve., Nov. 27

Everybody Welcome; Ladies Invited

Come and hear some facts about "That Wonderful Lease"

"Atten-shun!"

Have you ever seen a battalion of soldiers jump to attention at a word of command? When you lift your telephone receiver, every idle telephone in this city—and millions of other telephones, connected to a network as long and broad as the nation—stands ready to obey.

When you lift your receiver, there moves to

attention for your exclusive use whatever portion you need of hundreds of millions of dollars' worth of telephone equipment.

This equipment is in readiness now for conversations that you may wish to hold tomorrow, next month or next year, with persons whom you do not yet know!

Girl Fights Big Handicap

MANY a girl would give up in despair when she found herself snubbed in school and unpopular in college, but not so Mrs. Norma Kussel Jones of 1567 Cramer Street, Milwaukee, Wisconsin.

"When I was seventeen I went away to college," says Mrs. Jones. "Freda, my room-mate, was a very popular girl. Soon she asked to have her room changed. It seems I kept her awake at night, I slept so restlessly. No one knows how I suffered."

"One day one of my teachers found me sobbing. 'Why,' she said, 'sometimes sluggish circulation causes restlessness sleep. Why don't you try Nujol?'"

"In two weeks Nujol had begun clearing out the poisons in my body, my skin had a clear healthy

appearance, and everything looked brighter. 'What have you been doing to yourself?' asked my room-mate. 'You are a different girl.' The days and years that followed were filled with every activity and not long ago Freda was maid of honor at my wedding. That's what Nujol did for me!"

Such a simple way to health and happiness! Your doctor will tell you that Nujol contains no medicines or drugs—it is simply bodily lubrication—harmless, normal, and it works easily so you will be regular as clockwork. You can get a bottle in a sealed package at any drug store for what you would pay for two or three sodas.

Get a bottle today and try it. If you are like most other people Nujol will make you brighter, happier, more able to succeed. Don't put off good health! Start being well this very day.

Brave American Girls like this one never say die!

Costly Letters

"I hear she was married to a man of letters."

"Yes, and now he's paying alimony because of them."

Ambiguous

"This fellow says he never knew what happiness meant until he married."

"What does that mean?"

FIND OLD WALLS OF ROMAN TIMES

Rich Discovery Made by German Archeologists.

Berlin.—The foundation of a wall, consisting almost wholly of sculptured stones of the imperial Roman period, is the astonishing spoil of the spades of German archeologists working in the neighborhood of the town of Alzey in the Rhine country. Seeking for traces of a medieval church, they came upon the remains of a much older building, about sixteen yards square, which dates back to the days when the legions still occupied the parts of Germany that bordered upon Gaul.

The construction of the foundation was of a most unusual type of masonry. The stones consisted largely of sculptured fragments of ancient pagan shrines and temples, including among others, nine altars, twenty-five pieces of pillars, four stones with inscriptions, six broken statues and reliefs, and six blocks with images of gods on all four sides. The structure suggests that it was the work of builders who not only disbelieved in the old gods but were actually hostile to them and wished to show their contempt for them; therefore possibly of early Christian date.

An examination of the sculptures and inscriptions shows that here, as elsewhere in southern Germany, the pre-Christian populace of mixed German, Romans and Gauls identified local gods with deities of the Roman pantheon. Apollo was linked with Grannus, a Celtic divinity, and the Roman Vulcan with the Celtic Cerunus.

Jupiter is shown with a nine-spoked wheel, and the wheel is not a Roman emblem, but a German, being a figure of the sun.

Monument to Motherhood to Be Raised by Vets

Kansas City, Kan.—A monument to the motherhood of America is to be erected on the grounds of the V. F. W. National home at Eaton Rapids, Mich., founded four years ago by the Veterans of Foreign Wars of the United States, for the care and welfare of the widows and orphans of deceased veterans.

State commanders throughout the country will recommend one man from their respective states to act on a committee charged with the responsibility of gathering the necessary funds and erecting the memorial.

The movement, sponsored by a resolution adopted by the thirtieth national encampment of the V. F. W. held at St. Paul last August, contemplates the erection of "a utilitarian monument bearing the inscription 'To the Motherhood of America.'"

The contribution of American motherhood, manifesting itself in every human activity, affording stimulus and inspiration to the better causes of civilization, was cited by those supporting the plan as a "vital force in our American heritage."

The project also gives recognition to the "multiple and continuous sacrifices, both in times of war and in times of peace, on the part of the motherhood of America for the most part unhonored and unsung."

Dog Saves Cat's Life

but Earns No Gratitude

Malone, N. Y.—Dogs are not commonly known to befriend cats, yet one instance of such anomaly was witnessed here.

The cat had been missing three days. Its mistress hunted vainly for her, notwithstanding felines are supposed to return of their own will. Finally a state trooper, apprised of the lost pet, observed a dog standing on a rock ledge barking vociferously at an island in Salmon river.

Search of the island brought forth the cat, a bit haggard at having been marooned three days, but still able to "split" at the dog which had unwittingly saved her life.

Missouri "Houn" Dogs Increasing in Value

Springfield, Mo.—The houn' dog is not a thing of the past.

The major portion of coon and fox hounds in the United States are furnished by this section of the country. Each year, prior to the opening of the hunting season, buyers from all over the country come into the Ozarks to purchase hundreds of dogs.

And the value of the "old houn' dawg" has increased until a first-class one is now worth \$100.

Army Truck Operates With Wood for Fuel

San Francisco.—Using a sackful of broken tent poles for fuel, an army truck had demonstrated that it could pull a load of more than 35 tons.

Army officers watching the test of the invention of Col. Jean P. Lambert, former French army officer, were astounded by the performance.

The appliance invented by Colonel Lambert was placed in the truck in the place of the gasoline tank. After the container had been filled with wood a torch was applied, and a few minutes later when the truck had been cranked it chugged away with the load.

STUDY ENVIRONMENT OF U. S. CHILDREN

Nation-Wide Inquiry Is Sponsored by President.

Washington.—A nation-wide inquiry into the physical and social environment of the American child is moving forward. Permanent headquarters for a secretariat have been opened in the Interior department and 24 prominent educators, physicians, and sociologists have agreed to direct various phases of the investigation, which was sponsored by President Hoover.

Organization of the working force to place the American child under a microscope, determine his ills, and recommend means of curing them have been completed. The group of public men chosen to make the survey immediately will begin collecting data. Fully 18 months, they predict, will be so spent.

General Meeting to Be Held. With the study completed, a general conference of the committeemen will be called in Washington to consider conditions as they have found them and decide what may be done to improve them.

The investigation, announced by President Hoover at a White House conference some months ago, was made possible by a gift of \$500,000 by one of the President's friends. He declined to name them.

A complete picture of the American child and his environment will be painted by the investigators, who will turn the spotlight of science into the home and school in their search for facts. Public health organization, medical service for children, the family and parent education, vocational guidance, parental and maternal care—these are some of the subjects assigned to the study committee.

The Handicapped Child.

The handicapped child, including both the physically and mentally abnormal, will be the subject of a particularly diligent study. Four committees will work in this field. One will survey state and local organizations for the handicapped, another the physically and mentally handicapped child, yet another the child who is socially hampered by dependency, and finally, another will seek data on delinquent children.

A committee of 25 persons, including Secretaries of Interior Wilbur and of Labor Davis, was designated by Mr. Hoover to supervise the investigation.

Negress Gives Up White Baby in Hospital Mixup

Havana, Cuba.—A kinky-haired baby that nearly wrecked one Cuban home and a fair-haired infant that was the pride of another, were mixed up in the confusion of a hospital mixup.

Who thought she was her mother finally were returned to their proper parents when a strange case was solved in City court.

Berandina Vega, the negress, gave up the white child she had learned to love and look upon as her own, and accepted in its place a dark-skinned plectaninny that nearly caused a divorce in the family of Caridad Perez.

The two babies were born about the same time last December in a maternity hospital and were mixed during their first bath. As the days passed Senora Perez's charge began to turn dark of skin. The husband, after many stormy scenes, instituted suit for divorce.

Ten days ago Senora Perez called on the police to aid her in proving the child in her possession was that of a negress. Chief of Detectives Calvo started a search and found the white infant in the possession of Berandina.

California Coeds Get 2:00 A. M. Curfew

Los Angeles.—Two o'clock in the morning has been set as the deadline for coeds at the University of California at Los Angeles to return from dates. This decision was reached at a women's council meeting headed by Mrs. Helen Matthews Laughlin, dean of women. The time limit for week night dates was set at twelve o'clock. Freshmen have been limited to two week-end dates only; sophomores have been limited to two week-end dates and one during mid-week, while upper classmen may use their discretion so long as they are in their rooms before the deadlines. Special regulations governing houses where girls are staying were also discussed.

People So Law-Abiding Justice Is Idle 25 Years

Butler, Pa.—W. B. Higgins, justice of the peace in Oakland township for 25 years, probably has set a record. In all the time he has held the office he has not heard a case, civil or criminal, so law-abiding are the residents.

If differences arise between neighbors, Justice Higgins either reconciles them or advises that they take the case to another court.

Seized Slot Machines Turned Into Birdhouses

Merrill, Wis.—With a hammer and a jackknife John Aho whittled away his time in the county jail here making birdhouses out of confiscated slot machines. After breaking them to pieces the sheriff turns the slot machines over to the ambitious prisoner, who already had made several birdhouses which have been lodged in trees in the jail yard.

LIGHTS of NEW YORK

Matters of Memory

I have a friend who prides himself on a certain quirk in memory which enables him to remember telephone numbers. He can remember any person's telephone number, when he has heard it once. And this is not idle boasting on his part, as I have seen him demonstrate his ability many times.

The other day I dropped in at a store with him while he bought a new hat.

"What size?" asked the clerk.

"I don't know," replied my infallible friend. "Seven, or seven and one-eighth, or seven and one-quarter. Somewhere around there."

Sure Fire

In the old days of vaudeville, a lagging act was spurred on by the cry: "Go into your dance!" It meant that a comedian's lines weren't getting over very well, and a dance was a sure-fire way of getting out of difficulty. Nowadays, when whole choruses do more difficult steps than the highly paid specialty dancers of former days, some other life-saver must be found.

As a matter of fact, two life-savers have been found. One is for the performer to interrupt whatever he is doing, fall on one knee and yowl "Sonny Boy-y-y!" It never fails to bring down the house.

The other method is to speak Yiddish. Somehow, New York vaudeville audiences rock with laughter at hearing that ancient and honorable tongue, and it is employed every week at the Palace.

The other day Lou Holtz flung out a phrase or two. Nearly everybody laughed. Then, so that the others might laugh too, he stepped to the edge of the orchestra pit and said:

"For the benefit of the four or five people from out of town, I will explain what I said. I said 'I'll take the same.' You paid your money to get in here, and you're entitled to know all that's going on."

The Big Kick

There are all sorts of practical jokers, but the latest one I heard of is the man who somewhere bought an explosive golf ball. He started out for a round with a friend. The friend teed up an old ball. The practical joker said:

"You can't play with me with a ball that old. Take this new one."

When the clubhouse met the ball there was a loud explosion. That is supposed to be the big kick in the joke. It meant two extra rounds at the nineteenth hole.

A Sick Man

Douglas Fairbanks the energetic moving picture star, has always been an outstanding pattern of pep even when he was supposed to be sick.

Years ago, before he entered the movies, he was in the Lamb's club one day and was asked to appear in a benefit. He complained that he could not undertake to do it because he felt rotten and was going home to bed.

On the way out of the club he vaulted over a piano. If it had been one of his good days, he probably would have vaulted right over the first floor of the Lamb's club.

Pure Luck

Sometimes I have a suspicion that our great financial geniuses are not so smart, after all. It is a great comfort to think that millionaires are not wizards, but simply lucky. Such a relief permits me to think that I, too, may some day make a killing in Wall street.

One of the most satisfying anecdotes concerns a financial genius who telephoned his broker to buy 2,000 shares of something or other. The order was executed immediately. Ten minutes later the financial genius again telephoned his broker, and he was, to say the least, distracted.

"I've made a ghastly mistake," he quavered. "Something or Other is not the stock I intended to buy. I don't care where it is now. Sell it at the market."

This order, too, was executed on the spot. Twelve minutes after the brokerage firm had started buying something or other for its customers, all of that stock had again been sold.

The net profit was \$12,000. This particular stock had long remained quiet, and when all the stock gamblers saw an order for 2,000 shares placed, they figured that something was about to happen. So many of them put in additional orders, and the stock went up.

(By the Bell Syndicate, Inc.)

His Desire for Sole Place in Sun Costs \$20

Provincetown, Mass.—His desire for a place in the sun cost Frank Viera \$20 in court here.

It has long been Frank's daily custom to sit at the corner of Franklin and Tremont streets for a sun bath.

On a recent day, Antonio Carlos, who is blind, chose the same street corner as a nice place to bask in the sun.

"Here, move out. You're keeping the sun from me," Frank complained.

Antonio refused to budge and the scuffle that followed led to court.

LIFE'S LITTLE JESTS

HIS TRIAL

One of John D. Rockefeller's favorite stories is about an old man arraigned in court on a charge of vagrancy, who gave his name as John D. Rockefeller. Scratching his grizzled poll in perplexity at the outburst of laughter, the old man exclaimed: "Yassab, dat's mah real name, an' it's been a trial to me all mah life, Yuh Honah."—Philadelphia Public Ledger.

GAVE IT BACK

She—Jack stole a kiss from me. He—Slap his face? She—I would have, but he gave it right back again.

Consolation

"Don't worry if your job is small, and your rewards are few; Remember that the mighty oak Was once a nut like you."

He Probably Wouldn't Object

Wife (to hubby deep in his paper)—Ed! I told you you were wrong on that paint question. He—So? She—Yes, and you were also way off on the color of that wall paper. He—Yes? She—Ed, if you're going to be so unsociable I'm going to leave you this minute.

The Mistake

The owner of a cheap watch brought it into the jeweler's shop to see what could be done for it.

"The mistake I made, of course," he admitted, "was in dropping it."

"Well, I don't suppose you could help that," the jeweler remarked. "The mistake you made was picking it up."—London Opinion.

Defining Chickens

"When I order poultry from you again for Sunday's dinner," said the customer, "I don't want you to send me any more of those airplane chickens."

"What kind do you mean?" asked the dealer.

"The sort that are all wings," said the man.

HEAVY AS LEAD

Teacher—You shouldn't make such heavy strokes in your writing. Pupil—But I'm doing this with a lead pencil, you see.

Found

If happiness exists, I've found it—A half a mince pie With a boy around it.

Gettin' Uppity

Mose—Ah heah's yo' wife is gettin' all uppity these days wif a new secondhand hat and sech stuff. Rastus—Dat's so, brother. De next thing Ah knows dat woman'll be wantin' shoes.

No Smiles or Happiness

"We ought to make this world a place where everybody can be smiling and happy."

"No chance like that for me," said friend doctor. "I am a dentist."

Not So Good

"Your wife was overjoyed to have an old-fashioned elderly couple move into the flat next door."

"She crowed too soon."

"Why?"

"They have a melodeon."

All in the Same Box

Club Waiter—There is a lady outside who says that her husband promised to be home early tonight.

All (rising)—Excuse me, gentlemen.—Border Cities Star.

Don't neglect a COLD

Base in 5 Minutes—Comfort in 8 Hours

DISTRESSING cold in chest or throat—that so often leads to something serious—generally responds to good old Musterole with the first application. Should be more effective if used once every hour for five hours.

Working like the trained hands of a masseur, this famous blend of oil of mustard, camphor, menthol and other helpful ingredients brings relief naturally. It penetrates and stimulates blood circulation, helps to draw out infection and pain. Used by millions for 20 years. Recommended by doctors and nurses.

Keep Musterole handy—jars and tubes. To Mothers—Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

Keep Musterole handy—jars and tubes. To Mothers—Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

Keep Musterole handy—jars and tubes. To Mothers—Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

Take Care of Your Kidneys!

One should not neglect kidney and bladder irregularities.

Too many people sacrifice health by failing to heed the early danger signals of kidney disorders. Even minor irregularities should be dealt with promptly.

A drowsy, listless feeling; lameness and stiffness; constant backache and bladder irregularities are often timely warnings. Don't neglect them.

To promote normal kidney action and assist your kidneys in cleansing your blood of poisonous wastes, use Doan's Pills. Recommended the world over.

50,000 Users Endorse Doan's: Benjamin Franklin, 225 St. St. Manchester, N. H., says: "For a time I couldn't do any work, for when I bent over my back would ache. My kidneys acted very irregularly and I felt all out of sorts. After using Doan's Pills, I felt fine again."

Lydia E. Pinkham's Vegetable Compound Helps Her So Much

Pittsburgh, Pa.—"I was just completely run-down. I had tired, heavy, sluggish feelings and I could not eat. I was losing my weight. I read so much about Lydia E. Pinkham's Vegetable Compound and what a good medicine it is, that I started taking it. I have taken eight bottles of Lydia E. Pinkham's Vegetable Compound and I feel like a new woman. This is one medicine a woman should have in the house all the time. I am improving every day and I sure am able to eat. I am willing to answer any letters I get asking about the Vegetable Compound."—Mrs. ELLA RICHARDS, 21 Chautauqua St. N. E., Pittsburgh, Pa.

For any BABY

We can never be sure just what makes an infant restless, but the remedy can always be the same. Good old Castoria! There's comfort in every drop of this pure vegetable preparation, and not the slightest harm in its frequent use. As often as Baby has a fretful spell, is feverish, or cries and can't sleep, let Castoria soothe and quiet him. Sometimes it's a touch of colic. Sometimes constipation. Or diarrhea—a condition that should always be checked without delay. Just keep Castoria handy, and give it promptly. Relief will follow very promptly; if it doesn't, you should call a physician.

All through babyhood, Castoria should be a mother's standby; and a wise mother does not change to stronger medicines as the child grows older. Castoria is readily obtained at any drugstore, and the genuine easily identified by the Chas. H. Fletcher signature that appears on every wrapper.

Who Could It Have Been? It seems to be quite generally agreed that the Arab wasn't the guy that put the pat in Palestine.

Why Leave Home? Nipp—"Does your wife go to the talkies much?" Tuck—"Oh, no; she stays home and has 'em."

John's Mother Praises Doctor

There isn't a mother living who won't agree that no half-sick child should be the subject for an experiment with medicines of uncertain merit. When your child is bilious, head-achy, half-sick, feverish, restless, with coated tongue, bad breath, no appetite or energy, you know that nine times out of ten it's a sign his little stomach and bowels need purging. And when you know that for over fifty years leading physicians have endorsed one preparation for this condition, there doesn't seem to be any reason for "trying" things.

Rich, fruity California Fig Syrup clears the little stomach and bowels gently, harmlessly and in a hurry. It regulates the bowels, gives tone and strength to them and to the stomach; and helps to give your child new strength, energy and vitality. Thousands of Western mothers praise it. Mrs. Joseph W. Hill, 4806 Bedford Ave., Omaha, Nebraska, says: "I'll never forget the doctor who got me to give my baby boy, John, California Fig Syrup. Nothing else seemed to help his weak bowels. That was when he was just a baby. He suffered a good deal before I gave him Fig Syrup, but it stopped his trouble quick. I have used it with him for colds and little upset spells ever since. I consider him a Fig Syrup boy." Insist on the genuine article. See that the carton bears the word "California." Over four million bottles used a year.

Stroke and Counter-Stroke
Mrs. Mildred Melville Mallison of birth-control fame ended a lecture in Kansas City with an anecdote. "A childhood friend of mine," she said—"we'll call him George Jones—met me the other day in Cincinnati. George took me to task for my birth-control views. He wound up in a reproachful voice: "I got 11 children, Milly." "I stepped back. I pretended to be horrified. "Good heavens, George," I said, "you've gone stark mad!"—Detroit Free Press.

Not the Place
The country roads were pleasant. As they stopped at an intersection the young man remarked: "Here's a fork." "No place for a spoon," declared the girl.

Reason Enough
Why did they bury the cap-Head—Because he was dead.

Many find Russ Ball Blue good tonic for chickens. Large package at Grocers.—Adv.

Flake ice, made by freezing thin sheets of ice over metal plates, is replacing crushed ice because of its greater cheapness.

It is no pleasure for a man to do as he pleases until after he gets married—then he can't.

Those who inherit health should take care of it. It is worth more than a fortune.

Acidity

The common cause of digestive difficulties is excess acid. Soda cannot alter this condition, and it burns the stomach. Something that will neutralize the acidity is the sensible thing to take. That is why physicians tell the public to use Phillips Milk of Magnesia.

One spoonful of this delightful preparation can neutralize many times its volume in acid. It acts instantly; relief is quick, and very apparent. All gas is dispelled; all sourness is soon gone; the whole system is sweetened. Do try this perfect anti-acid, and remember it is just as good for children, too, and pleasant for them to take. Any drug store has the genuine, prescription product.

PHILLIPS Milk of Magnesia

Thanksgiving Sermonet

From Plymouth to the Golden Gate today their children tread,
The mercies of that bounteous Hand upon the land are shed;
The "flocks are on a thousand hills," the prairie waves with grain,
The cities spring like mushrooms now where once was desert-plain.

Heep high the beard with phantoms cheer and gather to the feast,
And toast that sturdy Pilgrims hand whose courage never ceased.
Give praise to that All-Gracious One by whom their steps were led,
And thanks unto the harvest's Lord who sends our "daily bread."

—Detroit News.

Thanksgiving as Sung by Psalmist

Whose offereth the sacrifice of thanksgiving gloriously? and prepareth a way that I may show him the salvation of God (R. V. margin). —Ps. LXX.

Thanksgiving, then, is not only of value in itself, but it makes it possible for God to do what He is all the time willing to do—bring us salvation, deliverance. It prepares a way for God to work.

Let us try and find out what the Psalmist means by the sacrifice of thanksgiving which glorifies God. He has already in very dramatic words said that it is not the usual animal sacrifices which constitute the sacrifice of thanksgiving. "For every beast of the forest is mine and the cattle upon a thousand hills. If I were hungry I would not tell thee; for the world is mine and the fulness thereof. Will I eat the flesh of bulls or drink the blood of goats? Offer unto God thanksgiving" (verses 10-14).

And with us it is something deeper than our outward gifts God wants. So many imagine they are doing God a favor by contributing to His work, or giving subscriptions, often very generous ones, to this or that. If it is not in these outward things that the true sacrifice of praise consists, what is it?

Its essence is the spirit of glad acceptance of God's gracious dealings with us. The key of life is to be found in that attitude. This is the sacrifice of thanksgiving. Instead of railing at fate, we see behind things a loving Father, at times dealing severely with His children, but always dealing lovingly. "Whom the Lord loveth He chasteneth, and scourgeth every son whom He receiveth."

Glad Acceptance of His Will.

So, confident in God's way, Paul and Silas could sing in the innermost prison. The groups of defenseless men and women in Nero's arena coming out of great tribulation, could sing, while the wild beasts were being loosed upon them.

As Madam Guyon in jail puts it in "The Prison of the Lord":
A little bird I am,
Shut from the fields of air;
And in my cage I sit and sing
To Him who placed me there;
Well pleased a prisoner to be.

This is not merely a grudging acceptance of God's way, but it is with the heart and glorifies God.

We need to be sure that the burden laid on us is of God, and not of our own negligence or folly, and we need ever to be seeking health and strength, the normal condition ordained for us of God. But when, beyond our controlling or erecting, grievous limitations constrict us, we do well to glorify God in the joyous spirit of Thanksgiving.

Attitude of Glorifying God.

It is not only in trials that thanksgiving should be rendered. There is the stress and strain of a task which taxes our powers, those powers which need continual exercise to make them grow. We glorify God as we rejoice in that He has called us to measure ourselves against real tasks. We honor God when we can thank Him for the full difficulty.

The sacrifice of thanksgiving, then, is an attitude to life and to God. It is an attitude that glorifies God since it gives Him credit for working sensibly, with wisdom, and according to some plan. We so often deny to God the foresight and wisdom we credit ourselves with. We should or should not do this or that because of some greater plan we have in mind. Yet when God brings things upon us, the full purport of which we cannot grasp, we so often plaintively lament His shortsighted vision. He has spilt our plans and we forget His grander plan.

Those who can rejoice with thanksgiving of heart for whatever He sends glorify God in recognizing His intelligent purpose.

Not only does the sacrifice of thanksgiving glorify Me, says God, but it prepares a way that I may show him the salvation of God. That is if we have hearts that can give God credit for acting sensibly in His dealings with us, if we can thank Him even when there appears to those who know not the Father's care, only cause for bitter repining. God can work out His will through us and for us. God can show us His salvation. His way of deliverance and growth. We are in league with Him in His good will for us and for the world.

Light Shines Most in Darkness.
The heart that can sing in the dark is assured of victory and deliverance. There was John Bunyan in Bedford jail. How thwarting it seemed to God's purposes for him as a preacher of the Gospel up and down the land. Shall he accept the imprisonment for the sake of God's revelation of truth as he has seen it?

"But if nothing," he writes, "will do unless I make of my conscience a continual butchery and slaughter-house, unless, putting out my own eyes, I commit me to the blind to lead me, as I doubt not is desired by some, I have determined, the Almighty God being my help and shield, yet to suffer, if frail life might continue so long, even till the moss shall grow on my eyebrows, rather than thus to violate my faith and principles." And his glad acceptance of the claim of God made it possible for God to work the way of deliverance for him, so that now John Bunyan lives on in the immortal Pilgrim of his prison-day dream.

Our Lord and Savior glorified the Father in His glad acceptance of His way for Him: "Nevertheless, not my will but Thine be done," and He thus prepared a way for the Father to deliver Him evermore from the pangs of death and sin and us all, weak sons of men, in Him.

Let us rejoice in His way whatever it may be for us and wherever it may lead us, knowing "all things work together for good to them that love God."

Days of Thanksgiving Common in Olden Days

In England, in 1298, "solemn fasts and general processions" were thought out to have helped a backward harvest. When the Pilgrims fled to Holland in 1608, Guy Fawkes day had newly been established as a day of "public thanksgiving to Almighty God."

So the Pilgrims were merely transplanting a custom when, on their arrival at Plymouth in 1620, they observed the first American Thanksgiving came in 1777, after the surrender of Burgoyne. Irregular observance followed until 1863, when, on November 23, every northern state gave thanks. Since then Presidential and state proclamations have been annual affairs, and the southern states, reluctant at first because they disliked Puritan institutions and later because it was a northern holiday, have long since made it unanimous.

By and large, we suppose we have about as much now to be thankful for as at any time in the past. We are unquestionably rich and prosperous—if not worthy.—Liberty.

In Reverence Thanks
There are services in practically all churches Thanksgiving day, all over the country. Every person who possibly can do so should attend these services, and join in the prayers and in the glad acclamations.

Three smart Paris chapeaux for autumn and winter, that show the trend toward felt and feathers. Top, a beige felt helmet. Center, a black felt. Bottom, an all-feather model.

Dame Fashion Smiles

By Grace Jewett Austin

With a big Sousa-directed march ringing in her ears from a loud speaker a yard away, Dame Fashion settled herself the other evening to try to co-ordinate in mind the many beautiful things for women's wear seen in the shops, and the hundreds of fashion pictures which are supposed to mirror the mind of Paris.

One thing is sure, that so far as the world of pictures is concerned, all of the talk of a few months ago that "curves were in" and "reducing days were over" seems to have come to naught. For the Paris and American designs are ready and slender to a degree, with trimming placed low on the skirt.

But in practice there are simply beautiful dresses for every woman. Individuality—this great cry of the present, works out well for the plump, the middle-aged and those who still cling to a modicum of simplicity. And yet it is well to keep Pope's couplet in mind,

Be not the first by whom the new is tried,
Nor yet the last to lay the old aside.

Some have accused fashion writers of spending most of their stress on the gowns and accessories only fitted for the evening dance or the dinner of ceremony. Since these in every age have been the most strikingly beautiful of all dresses, it is only natural that they are shown and described with special delight. But there is a vigor and "go" to the street and sports frocks this year, caused by the present plaits, belts, tuckings, special cuffs and collars which give these dresses a rare beauty that is unusually satisfactory and appealing. If quiet in color, they can be brightened with a touch of costume jewelry (not too much, for the world of fashion is said to be slowing down a bit in the use of what some have called "lumps of glass") and contrasts in shoes, bags and gloves. Mistress Hat still holds her post as queen of the costume.

Dame Fashion has never thought she had the type of face suited for earrings, but some of the new ones are lovely enough almost to make one decide to wear them even if not becoming. (Though that is heresy.) It seemed a striking conquest for the earrings when one of the recent portraits of Helen Willis, the tennis champion, always such a devotee of sport simplicity, showed her wearing flat button earrings of pearl.

As proof of what was said at first, that slowness is still needed for some of the fashions of the year, Dame Fashion has to chronicle that she has at last seen her first fur ensemble dress—fur skirt as well as long coat. It was soft and flat fur—but ah, how greatly most of us in that garb would resemble the ladies of the Eskimos! (© 1929, Western Newspaper Union.)

New Raincoats Protect as Well as Add Charm

Winter wet weather wear will protect as well as beautify every lovely woman.

Crepe de chine is the most important of raincoat materials and plaids, now bi-colored and in small designs, are holding their own.

Many of them are unlined, for it is almost always necessary to wear a heavy garment beneath, and by eliminating the wool lining, the slender line is preserved.

A delightful coat in dark blue crepe de chine has plaid trimming on the pockets and skirt-capes. Another in green and beige has gold and smartly placed belt just as on any other costume.

An almond-green cape is lined with beige and has zig-zag diagonal incrustations.

Felt and Feathers Are Paris Millinery Modes

Three smart Paris chapeaux for autumn and winter, that show the trend toward felt and feathers. Top, a beige felt helmet. Center, a black felt. Bottom, an all-feather model.

Twined and Velvet Lapin Make Chic Combination

The combination of twined and velvet lapin fur is important in this season's suit mode. This suit combines these materials in the charming silhouette of three-quarter length coat and flared skirt with the forward movement.

Matching Silk Is Used to Line New Handbags

Perhaps you should never look a gift horse in the mouth—and yet if you present your sister or your aunt, your mother or your daughter with one of the new bags, the chances are that after she has given one appraising glance at the outside she will look inside to examine the lining, the mirror, the coin purse and the various pockets and flaps.

Almost all of the new bags, writes a fashion correspondent in the Washington Star, are lined with machine silk, and the flaps and pockets are often finished with a narrow binding of leather. Even flat bags of the envelope sort are made with sufficient breadth within so that they will not bulge even when carrying the usual collection of small accessories.

Handbags are among the most interesting details of autumn dress. The most noticeable thing about them is that they are simple, serviceable, practical and very smart.

There are, of course, bags of beads and velvet, chiffon and embroidery for evening and elaborate afternoon. But for daytime wear there are all sorts of leather bags, a color and kind to match every suit and frock and coat in anybody's wardrobe.

The best thing about these smart bags is that one may be used with several frocks. They are made of good leather, in lovely but substantial shades of every color, browns from lightest to darkest, through all ranges of tan and beige, buff and ecru; greens and blues and maroons, or any color to go with any fabric.

There are pouch bags of leather, with metal frames or leather-covered frames or composition frames. There are envelope bags with openings in rather unexpected places, little flaps that hook over at the bottom to secure the opening of zig-zagged side flaps or three or four flaps all following the same unusual outline of angles or curves.

There are capacious pockets in the handbags of the day, for even the slim, flat envelopes are so made that they have an unexpected holding capacity.

Clasps and fastenings are interesting in the new handbags. They are made of composition in all colors and of metal. Buttons, leather covered or of composition, are used to hold some of the bags shut.

Dainty New Jewelry Is Made of Marcasite

A new use of a new medium, marcasite set with real stones, is seen in an outstanding bit of jewelry, wrought in as quaintly old-fashioned a design and quality as though it had come straight from the native age of samplers, lace pantaloons and paper-dolled nosegays. The background is covered solidly with tiny flat marcasites, each flower as stiff and fitted neatly against the next as though some painstaking child had placed them so.

The petals are made of marcasite, and the prin centers are of halved round stones and size of shot, coral in one case and topaz in another. The design serves as the decoration for a ring in a marquise shape, an inch long; for a daisy chain necklace and for an earring.

Crystal, a new composition material used for modernistic jewelry in inexpensive forms, resembles crystal, but has the advantage of being molded rather than ground.

Its chief charm comes from an odd faulting which gives a clouded effect through it like flowers seen in a clear pool. It is brought out in natural and amber shades, which show off the clouding to best advantage.

WHY WE BEHAVE LIKE HUMAN BEINGS

By GEORGE DORSEY, Ph. D., LL. D.

Pin Scratch May Be Fatal as a Rifle Ball

"FLEA" is any animal that lives on or within the body of a host and depends on that host for its food. All such are parasites. Eccles claims that half of the animals in the world are parasites.

The most numerous and deadly parasites come from that great half-animal, half-plant underworld known as bacteria. Second only in deadliness are some of the unicellular organisms of the animal world, the protozoa. More annoying, but of quite a different order in their powers of destruction, are some of the lower members of the metazoa subkingdom.

To the extent that parasites live on or within us or find a temporary home with us, and to the extent that they are causes of disease and death, they are proper objects of our interest and fit subjects for our attention. Indeed, the claim had been made that natural death in man and higher animals is due to parasitic organisms. This probably overstates the case, but it is a fact that micro-organisms enormously influenced organic evolution, that certain forms are constant menaces, and that no part, tissue, or function of our body is germ-proof. The menace is great because of their astounding capacity to multiply, constant because, like the poor, they are always with us. A pin scratch may be as fatal as a rifle ball; careless handling of milk may plague a city.

The general problem of parasitism is complicated. We shall look only at those parasites which are prone to infect the human body and are likely to cause disease. What are they, how are they carried, how do they enter our body, what damage or disease do they cause, and how may we be rid of them or acquire immunity? The answers to even these questions are often interrelated.

Malaria, for example, is not a bacterial disease, nor do we "catch" it—it is brought to us by a mosquito. Malaria, as a disease, is not understood without reference to its carrier and without a knowledge of the life cycle of the germ which causes malaria. Again, rats are not parasites, yet some of the deadliest scourges of the human race are rat-flea-borne diseases. Why are the rats and fleas immune to plague? And how do they carry germs? The venom of a cobra, the ricin of the castor bean, the toxin of diphtheria germs, are deadly. Are they related substances? Only in their disruption of normal human processes of living and in the similarity of the response our bodies make to such substances.

It is true that no question can be raised regarding any one phase of any human process of living without removing the lid of all of life. The intricacy of life in its simplest forms is profound enough; it is not amplified by the addition of parasites. And yet possibly all living processes in higher organisms are brought about by aggregates of protein molecules, which function as micro-organisms. If we only knew more about the protein molecule!

We shall, for keen minds are on its trail, and sooner or later it will yield its secret and life will be new again.

Meanwhile, there are mosquitoes to swat. And with them we may begin to call the roll of our parasitic enemies. Mosquitoes belong to Hexapoda (six-footed) insects, the most diversified, the most numerous, and for their size the smartest of all animals. Lice, fleas, ticks, bedbugs, jiggers, mosquitoes, flies—dozens of kinds, millions of each. And a variety for every plant and animal on earth big enough to carry one. They live on us, they live off us. They give us nothing useful. They irritate us. But they do not kill us. We are accustomed to them, "adapted," immune.

That is what immunity means. We are not exempt from fleas or dozens of other parasites. Only immune. We can stand them. The germ of death or disease carried by a parasite is another matter. Immunity may come in many forms.

Insects are the highest animals which infest or bedevil the human body. Lower in the scale is a flatworm, the long, flat Taenia, or tapeworm. Its life history is longer and not at all flat. Man gets it from unsalted, uncooked pork. In his alimentary canal it loses most of its anatomy and becomes head and long body of dozens of segments, each for breeding purposes a complete male and female. That is what it is, a series of reproductive units. It needs no sense organs, has none; as it feeds on predigested food it needs no digestive apparatus, has none. Its head is a hook to hang on by and a siphon to suck up food.

Our next lower animal parasite enemies are the two threadworms—hookworm, trichina. The trichina is well understood and now under control; we hear little of it. The hookworm is well understood; but people will go barefooted.

(© by George A. Dorsey.)

Recess in History
The rejoicings of victory, the melancholy moments of grief, have known roses. Arrows of delight, the dissolution of surrender, playtime of children, dreams of aging men and women, hesitant hope of the sick, all have known the language of roses. In the choruses of the world's sentiment they have sung their part.—Boston Herald.

HEALTH PRESERVATION IS AIM OF RED CROSS

Society Employs Rural Public Health Nurses—Teaches First Aid and Life Saving.

A comprehensive, nation-wide program to prevent illness, and to save lives through proper nursing care and advanced methods of life saving and first aid is fostered by the American Red Cross.

The organization is the largest employer of rural public health nurses in the United States, through its chapters. The policy of the Red Cross is to encourage its chapters to extend the public health nursing service, where leadership in this field is not taken by some other agency in the community.

The Red Cross health and life saving campaign embraces the following: preservation of health through skilled nursing care; prevention of loss of life in accidents; prevention of illness through cleanliness in the home and knowledge of methods of home care of the sick and raising the standard of health and physical efficiency through proper nutrition.

During the year just closed, more than 45,000 certificates have been issued in the Red Cross course in Home Hygiene and Care of the Sick, and since the courses were inaugurated more than 500,000 persons have been taught; 140,000 children were instructed in proper eating through the Nutrition course; 45,898 individuals passed the severe Red Cross tests in life saving and 52,596 persons passed the rigid examinations in the First Aid Course.

This work is supported from funds obtained in the annual Roll Call, Armistice Day to Thanksgiving Day, November 11 to 28.

SIX MILLION CHILDREN IN JUNIOR RED CROSS

The year 1929 marks the tenth anniversary of the founding of the American Junior Red Cross. There are now Junior Red Cross societies in forty-one nations, all pledged in the common cause of service to their fellows.

Membership in the American Junior Red Cross in the United States and insular possessions is 6,878,000, and is largely through grade and high schools and private schools. The organization is governed by the boys and girls. One of its chief features is conduct of international correspondence with schools of other nations, through exchange of letters and small gifts. The American Juniors sent 55,000 Christmas boxes of small gifts to children of many nations last year.

The American Junior Red Cross gained 343,171 in membership last year.

Passion for Education Mark of Truly Great

In a biography of George Washington it is narrated that he was reluctant to visit France at the end of his presidential term, because he could not speak French.

Which is only another tribute to his greatness and his wisdom. What wise man does not regret the lack of education? There is so much to learn in life and so brief a time in which to learn it! To grasp the life and literature of those ancient lands from which our civilization and all our religions are derived would require a couple of centuries at least. And then we would only be in the A B C class of modern study.

The more one really learns, the more one wants to learn. All who have tasted of education must regret their lack of complete possession of it.

Desert Conditions Common

Deserts, in the sense of great areas that are at all times hot, dry and nearly devoid of life, are comparatively rare. But desert conditions, in the sense of high temperatures and shortage of water arise at times on almost all land areas. Seasonal deserts, areas that for a part of the year have an abundant water supply accompanied by a luxuriant vegetable growth, and through the remainder of the year have no water supply and can show only dry masses of dead leaves and stems, are common. Illustrations of such conditions may be found along any roadside in midsummer. They are very common in places where there is but a thin layer of soil over bed rock.

Radium Prevents Fires

One of the hazards of the rubber factory is that as the sheets pass over rollers for compression, electric sparks are often given off and at the same time the air is filled with inflammable vapors. This combination is a dangerous one and often causes a conflagration. In a foreign factory it has been discovered that this menace is removed by the presence of a tiny capsule of radium in the presence of the rolling machinery. It is explained that the radium ins some action on the air in its vicinity which enables electricity to pass slowly and harmlessly from the rollers and thus saves the factory from destruction.

Homely House Pet

On the island of Santo Domingo there is to be encountered a great variety of insects which, in one form or another, are active during the 24 hours of the day. The houses are kept reasonably free from these pests through the activities of the "gecko" which makes its home in the houses, but refuses to share hospitality with any form of insect life. The gecko is a terrible looking lizard which is perfectly harmless and it moves slowly about the house and gathers up insects of all kinds. It is slow until its eyes light on its prey and then it is quick enough to make a bull's snout and rarely misses.

Preservers That Defy the Corruption of Death

A man's body was found standing upright in a block of ice and was chopped out of a crevasse in a glacier of Mount Rainier. This there is a reminder of the pathetic story told many years ago when Mr. Frederick Stimson was writing as "J. S. of Dailo": The story of the body preserved in an Alpine glacier, slowly moving, but finally restoring the loved one to the patient waiter. Or there is the frozen pirate, the hero of a novel by Clark Russell, though this pirate was not saved from immediate death by a glacier.

Asches and lava are also indifferent uncorrupt preservers. Witness Pompeii and Herculaneum. There are natural earths that have been said to retain bodies as they were above the ground. Was the coffin that held the marquis of Dorset of a special wood or metal that after seventy-eight years his body was found uncorrupted. "In color, proportion, and softness like an ordinary corpse newly to be interred?" Or was this due to the properties of the cerecloth?

Is there any index of stories in which the strangely preserved, mummies included, have come to life, and welcomed the amazingly changed world; moved as strangers in a strange land; worked evil on descendants who had mistakenly revered their memory and boasted of lineage? It is no doubt better, as Bert Williams used to say, that "death is so permanent."

"Fistic Art" Had Origin in Days of Barbarism

Although boxing as a science is relatively modern, it was in the blazing sun of Italy and Greece, in the great amphitheatres of long ago, where barbarian captives fought and died to tickle the fancy of the populace, that boxing as a sport was born. That these people must have developed a skillful school of boxing during the period in which the cestus was used is certain, but unfortunately little is known either of the style of fighting or of the personal attributes of the boxer by which a comparison can be made between those long-dead champions and the modern wielder of the padded glove. The nearest connecting link is the famous Greek statue chiseled in three-fifths marble known as "The Boxer." This, at least, affords a study in character.

During the early part of the eighteenth century in England boxing was about as inhuman a sport as one can imagine. The middle of the century, fortunately, saw the dawn of a new day for the boxer, for at this time Jack Braghton, a young English champion, invented boxing gloves and originated a code of rules prohibiting much of the former savagery of the sport, on which many of the future rules have been based.—Philadelphia Ledger.

Perfect Mother-in-Law

She has a marvelous talent for timing her visits. She always arrives the day you need her and never stays a day too long. She always brings cheer and helpfulness and a big basket of things from the old farm. She gets along beautifully with her sons and daughters-in-law. She knows how to please her grandchildren without spoiling them and rubbing their digestions. She knows how and when to write a check and when to make beaten biscuits and fry a chicken. She has perfect health and a young mind. She is the perfect mother-in-law. There is always the chance that you will get her if you marry often enough.—Kansas City Star.

Peculiar State of Mind

"It may be a complex, a phobia, or a neurosis," said the street-car rider, "but there's just one thing on my mind when I take an open car. I usually sit on the back seat, or on an inside end seat. In either place I have a good view at the slot which projects the live wire in the street below. I've been tossing my cigarette butts at the slot, wondering if they'd ever go in. It's really become an obsession, since they never seem quite to make it. I'm meditating getting off and pushing one in some time, so I'll be able to get my mind on other matters while I ride."—New York Sun.

Nation's Fur-Bearers

Among the states producing the most fur-bearing animals it is probable that Louisiana ranks highest on account of its large muskrat catch. Martens appear most plentiful in Northwestern states. Minks are plentiful throughout the wooded areas of this country where trapping has not been carried on extensively. Blue foxes do not occur wild in the United States. Red foxes are common throughout the greater portion of this country, most of them being in the Northern wooded regions. Fishers are found almost exclusively in the Northern states where civilization has not disturbed their haunts.

LEGAL NOTICES SUMMONS

In the Superior Court of the County of Contra Costa, State of California. No. 15587.
W. N. Bowyer, plaintiff, vs. Philip Sojat, N. Lillgren, Loretta B. Morrell, C. B. Clark, as administrators with the will annexed of the Estate of Frank S. Soito, deceased, First Doe, Second Doe, Third Doe, Fourth Doe and Fifth Doe, Defendants.
Action brought in the Superior Court of the County of Contra Costa, State of California, and the Complaint filed in the office of the Clerk of said County of Contra Costa.
The People of the State of California send greeting to Philip Sojat, J. H. Lillgren, Loretta B. Morrell, C. B. Clark, as administrators with the will annexed of the Estate of Frank S. Soito, deceased, First Doe, Second Doe, Third Doe, Fourth Doe and Fifth Doe, Defendants.
You are hereby directed to appear, and answer the Complaint in an action entitled as above brought against you in the Superior Court of the County of Contra Costa, State of California, within ten days after the service on you of this Summons—if served within this county; or within thirty days if served elsewhere.
And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment against you for any money or damages demanded in the Complaint, as arising upon contract or will apply to the Court for any other relief demanded in the Complaint.
Given under my hand and the seal of the Superior Court of the County of Contra Costa, State of California, this 27th day of September, A. D., 1929.
[SEAL] J. H. WELLS, Clerk.
By W. T. Pasach, Deputy Clerk.
George T. Barkley, 924 Main Street, Martinez, California, atty for plaintiff. o18-e 20

Notice of Hearing on Petition For Conveyance of Real Estate

In the Superior Court of the State of California, in and for the County of Contra Costa.
In the matter of the estate of George R. Potts, deceased.
NOTICE is hereby given that Herbert P. Lods and Frances A. Lods have filed herein their petition praying for an order of this court directing the administrator of the estate of George R. Potts, deceased, to convey to them the following described real property:
All those certain lots, pieces or parcels of land situate in the City of Richmond, County of Contra Costa, State of California, and bounded and particularly described as follows, to-wit:
The South 30 ft. of Lots No. One (1), Two (2) and Three (3), in Block No. Thirty-four (34), as delineated upon that certain Map entitled "SANTA FE," being a subdivision of Lots No. 41 and 42 of the final partition of the San Pablo Rancho, Contra Costa County, Cal. Filed on the 17th day of March, 1900, in the Office of the County Recorder of the County of Contra Costa, State of California.

Notice is hereby given that a hearing will be held on said petition on the 2nd day of December, 1929, at (ten) 10 o'clock A. M. of said day at the Court Room of Department No. 1 of the above entitled court in the courthouse in the city of Martinez, County of Contra Costa, State of California, when and where all persons interested may appear and show cause, if any they have, why said petition should not be granted.
Dated this 30th day of October, 1929.
J. H. WELLS, Clerk.
By L. GREYER, Deputy Clerk. u1-29

SLEEPY GUESTS
—the cause is poor lighting

Carefully you plan a social evening. You wink at expenses. Guests arrive in a cheerful mood. But poor lighting tires their eyes, makes them sleepy early. And dulls the whole party.

Why let poor lighting spoil any evening when good lighting in the living room costs but 1 1/2c an hour!

For this trivial sum you can have the best in lighting. In it lies enchantment—draperies and furniture have added charm, social evenings are more enjoyable, one's complexion seems smoother and more beautiful.

Would you like to know more about proper home lighting? The P G and E's local office has lighting specialists to advise you. Or if you like, we'll send to you without cost or obligation, our 32 page booklet containing 27 full pages, 8 by 11 inches, of handsome pictures portraying the romance of home lighting from early Babylonian times until today.

Write to the Pacific Gas and Electric Company, Room 428, 245 Market St., San Francisco, or telephone to our local office. Ask for "The Romantic Evolution of Light."
